HISTORICAL CHECK

Year of manufacture:

Date of purchase:

Date of first use:

The results of this P.P.E. inspection are provided to you subject to the condition that the components to be inspected do not come into any of the categories listed below, any of which would require the systematic rejection of the component, namely:

- Component has received forces resulting from a fall of factor 1 or more.
- Product is more than 10 years old.

The inspector accepts no responsibility in the case of omission or inaccuracy in the information concerning the checking of the component's history, which must be done by the client.

VISUAL CHECK OF THE SAFETY COMPONENTS

- Condition of the body (cracks, marks, deformation, wear, corrosion)

- Condition of the cam stop (cracks, marks, deformation, wear, corrosion)

- Condition of the cam (worn or missing teeth, corrosion) and of its rivet (cracks, marks, wear, corrosion)

- Condition of safety catch (pin - wear of polyamide part)

OPERATIONAL CHECK

- Effectiveness of the return spring of the cam

- Effectiveness of the safety catch spring

- Complete opening of the safety catch on the body of the rope clamp / grab

- Slides up the rope and jams when pulled down the rope
